

Glow-in-the-Dark means fun! Whether it's Halloween, an Electronic Dance Music (EDM) festival or a dark movie theater, placing Glow-in-the-Dark on a consumer product or package begs for playful interaction that builds brand touch - literally! Boost brand recognition, recall, trust and ultimately sales with this unique feature.

We have taken traditional Glow-in-the-Dark (GID) ink to the next level by developing several formats. CTI has a proprietary formula, called "Power Glow," for the best quality and glow in the industry, and designed for high-speed printing on packaging, CTI's Design team will work with customers to optimize the design for the biggest impact in the consumer's hand.

Available Formats:

- UV Flexo Low Oder
- UV Wet Offset
- Flexo Electron Beam Curable
- Flexo Solvent-Based

Available Glow Color: Green

Glow-in-the-Dark inks suit high-end, large quantity consumer packaged goods. Contact us today to qualify these inks and anticipate brand requests.
